LEGEND

- Circuit breaker
- Air circuit breaker, withdrawable
- Transformer, two winding
- Generator
- UPS (rectifier, battery, inverter)
- Incoming supply
- Busbar
- LV cable
- HV cable

NOTES

1. Symbols to IEC 60617 (AS/NZS 1102). Single line representation; one line is a three phase circuit.
2. Protective devices at boards are drawn from each port's device and rating attributes in the model.
3. Cable text: connection id, construction and route length.
4. Generated from rd110_elec_paris.yaml (sha256 39e1b016e4fe) by industroml drawings 0.1.0. Edit the model and regenerate rather than editing this drawing.
