

LEGEND

- Circuit breaker
- Transformer, two winding
- Motor
- Variable speed drive
- Incoming supply
- Busbar
- LV cable
- HV cable
- Switchboard enclosure

NOTES

1. Symbols to IEC 60617 (AS/NZS 1102). Single line representation: one line is a three phase circuit.
2. Protective devices at boards are drawn from each port's device and rating attributes in the model.
3. Cable text: connection id, construction and route length.
4. Generated from ravenbrook_site.yaml (sha256 77118f0565cf) by industroml drawings 0.1.0. Edit the model and regenerate rather than editing this drawing.
